

Sonic Dx

Icon Glossary

Sonic Dx is a revolution in mobile results access. This feature-rich app is fast, easy to use and intuitive. It has been developed especially for mobile devices, giving you rapid access to results when and where you need them.

Sonic Dx's enhanced functionality allows you to easily customise your reporting workflow to your individual needs.

Major Lists

In Tray

The central spot for all incoming reports

Search

Search for results using a wide range of match criteria

Watched

Highlight specific patients to easily identify future results

Folders

Store patients / specific episodes by category (e.g. diabetics, interesting cases, current ward bed occupants etc.)

Viewed

Access your recently viewed episodes

Major Lists Tools

Filter

Filter your lists according to specific entries, such as Urgent, Last 2 days, INRs etc.

Refresh

Update your content with the latest information from our database

Refine columns

Decide which columns you want to display in your list (you can also determine the sort order)

Turn on

Turn off

List Entries

-  **Flagged Abnormal** Episode contains at least one result that is out of range
-  **Watched** Episode has been highlighted by user as a watched patient
-  **Urgent** Episode has been treated as urgent
- ↓ **Sorted: Descending** Column is sorted from top to bottom
- ↑ **Sorted: Ascending** Column is sorted from bottom to top
- **Copy to** Signifies you are a 'copy to' doctor

Opened Episodes

-   Add to / Remove from the Watched List
-   Send to / Remove from a Folder
-   Restore to / Remove from the In tray
-  Share episode (or single test) report with a colleague or patient
-  Select a specific result within an episode, to be displayed on your device, or shared with another recipient
-  Access history of users who have opened this episode online
-  Cumulative pathology results (tabular and graphical)
-  Expand / contract the episode header details to be shown
-  Expand / contract all results
-  Request an additional pathology test, if possible
