

Sonic Pathology Handbook

Now available on Desktop, iPhone/iPad & Android

An electronic guide
to more than 900
pathology tests,
written specifically
for the Australian
medical community

The Sonic Pathology Handbook is now available online, and as an app for your mobile devices.

Quality is having information at your fingertips

SonicEdu is the digital version of the Sonic Pathology Handbook — a practical, in-depth reference that has been developed to assist Australian doctors in their day-to-day clinical practice.

Written by 65 Sonic Healthcare pathologists, the handbook provides information on more than 900 pathology topics, and reflects our deep, collective knowledge across all areas of pathology, including specific, high-level expertise in a broad-range of subspecialties.

Importantly, the handbook has been written by Australian pathologists for Australian doctors, making it a unique resource within our medical community. The digital versions contain up-to-date information, giving you immediate access to the latest test information and position statements.

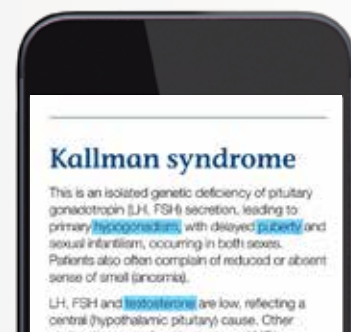

Multiple formats

SonicEdu is available in app form (iPad, iPhone and Android Smartphones and tablets) or on your PC via the internet.

Always current

SonicEdu is automatically updated whenever your device is connected to Wi-Fi. Updated topics are flagged for easy reference. All content is stored on your mobile device, so you can look up tests even when you aren't connected to Wi-Fi.

Hyperlinks

Hyperlinked references take you directly through to related topics or to cited references on the internet.

Search function and predictive text

Search for tests and conditions using predictive text. The search returns a list of conditions and tests where the searched term is in a heading or within the text.

Seamless integration with Sonic Dx

SonicEdu links seamlessly with Sonic Dx (our online results app).

To find out more information about a test or condition listed in a Sonic Dx result, simply long-press (press and hold) a word in the electronic test result, and the app will automatically switch to a list of suitable topics in the handbook (users must be logged in to both apps simultaneously).

How to access SonicEdu

Desktop

Go to www.sonicedu.com.au

iPhone/iPad

Search for SonicEdu

Android

Search for SonicEdu

All users need to register at www.sonicedu.com.au/register
