Leading the way in pathology services

Clinpath Laboratories is a local, well-established pathology practice providing laboratory services for more than 25 years to general practitioners, specialists, private hospitals and aged care facilities in Adelaide, South Australia.

We have a team of highly respected and experienced pathologists each with their area of interest and specialist expertise. Together, they provide a comprehensive knowledge base to complement a service customised to our referring practitioners.

We are managed by doctors for doctors, and have a commitment to scientific and service excellence, ethical business practice and supporting the community.

Our Laboratories

A commitment to scientific and technical excellence

All our laboratories are of the highest standard and are fully accredited with the National Association of Testing Authorities (NATA) and the Royal College of Pathologists of Australasia (RCPA).

The main laboratory is located at 19 Fullarton Road, Kent Town and there are more than 150 collection centres located across Adelaide and regional South Australia for patient convenience.

Hospital laboratories are also associated with Calvary Central Districts, Calvary North Adelaide, Calvary Wakefield, St Andrew's Hospital, St Andrew's Oncology and Western Hospital. Clinpath provides a round-the-clock pathology service to all centres 24 hours a day, 365 days per year and are appropriately staffed to respond to emergency situations at all times.

At Clinpath, we pride ourself on being able to adapt our services to the needs of each individual practice and doctor, whether you are a general practitioner or a specialist. This extends from our courier service to every area of the laboratory. We encourage pathologist and doctor communication whenever required. A dedicated Client Liaison Officer is appointed to look after each medical practitioner to ensure individualised service.

Sonic Healthcare

Ethical business practice and medical management

Clinpath Laboratories is a local laboratory established more than 25 years ago. Together with Douglass Hanly Moir Laboratories, it was a founder member of Sonic Healthcare Ltd, an Australian success story, growing to become one of Australia's largest pathology providers and the third largest in the world. It remains a fully Australian-owned publicly listed company and continues to run a medically-led federation of local laboratories, supported by the expertise and resources of our national and international partners. The Sonic Board, which is composed of ten directors, includes pathologists and radiologists, ensuring that decisions made at board level are medically influenced.

Through its widespread Australasian presence, strong teamwork and systems, and genuine commitment to patient care and excellence in service, Sonic is able to benefit from the continual sharing of information between practices to ensure world class quality and provide the widest range of tests.

Sonic Healthcare's extensive network of pathology and radiology groups brings with it an unparalleled depth of specialist medical expertise and commercial experience.
