

IMPORTANT ANNOUNCEMENT

We are delighted to announce that Clinpath Laboratories and Adelaide Pathology Partners have entered into a legally binding agreement to merge and to operate as a single integrated pathology laboratory serving South Australia.

With over 19 specialist anatomical pathologists and 9 specialist clinical pathologists, the combined entity will offer a depth of knowledge and expertise, unprecedented in private pathology in this state and including many pathologists with national and international reputations.

We are understandably excited by the prospects of this new enterprise, but we recognise that the service we provide to you is what matters most. In that respect, it will be “business as usual” for all your pathology service requirements and we assure you that whilst this integration will provide significant synergies and service enhancements, your existing, valued relationships with our pathologists, business development representatives and customer support team will remain unchanged.

As practices that share a common culture and a strong commitment to medical leadership, the pathologists and staff of Clinpath and APP are well matched to provide you and your patients with the best and most advanced private pathology service in South Australia.

In the weeks and months ahead we will ensure that you are kept well informed of our progress. In the interim however, if you would like to discuss any aspect of this change or have any concerns please do not hesitate to contact us directly or through your usual business development representatives.
