

## IMPORTANT ANNOUNCEMENT

I am very pleased to inform you that the legal merger of Adelaide Pathology Partners (APP) and Clinpath reached completion on Wednesday 9th December. The reassignment of leases for laboratories and collection centres and Medicare licenses from APP to Clinpath has gone very smoothly and with considerable goodwill across the broad medical community.

As a testament to our quality based culture and philosophy of medical leadership I am also equally pleased and proud to confirm that all APP partners and pathologists have joined Clinpath and remain fully committed to providing you with the personalised service that you have come to expect and rely upon.

With a medical faculty of 28 specialist pathologists, some with national and internationally recognised and acknowledge expertise, we have the unprecedented opportunity to provide the best private pathology service for the benefit of all South Australians.

For now, our focus is very much upon transitioning to a new combined practice in the most effective way whilst maintaining, and wherever possible, enhancing our service. To assist you in this transition phase we have prepared a list of Frequently Asked Questions and answers to guide doctors and practice managers in the coming weeks.

The key message is that there will be no immediate change to your current practice and we will endeavour to make the change as seamless and invisible as possible whilst maintaining the high quality service that you have come to expect from both APP and Clinpath.

If you have any further questions please do not hesitate to contact Business Development on 08 8366 2020.

A/Prof David Ellis  
Chief Executive Officer  
Clinpath Laboratories
