

Create special folders

Create your own personally defined folders to easily retrieve specific patients or results. Choose between 'Patient' folders that always store that patient's latest results (e.g. Diabetics or Company XYZ Staff), or 'Report' folders that store specific episodes (e.g. Interesting Episodes).

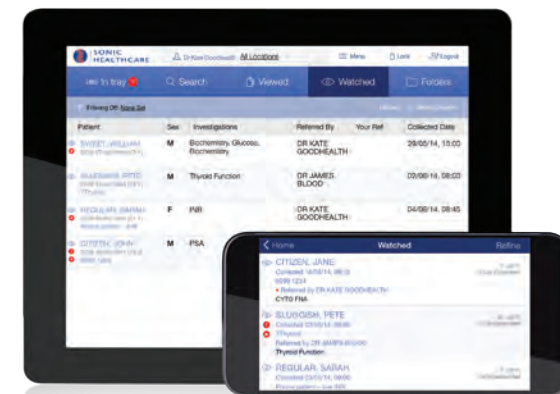

Securely share reports with colleagues or patients

Provide your colleagues or patients with securely transmitted pathology reports. Simply enter their email address, a PIN number and their mobile phone number (optional) into your handheld device. An email will be sent to them with a link to their PDF report, providing secure and simple downloading.

Create a Watched list

Nominate patients to be added to your Watched list, and include your own brief note about why they are being monitored. These patients will be listed in blue in your in-tray every time their results appear, so they can be easily identified. Watched patients could include people with a specific condition who are being closely monitored, or cases in which you have a special interest or obligation.

Request additional tests electronically[^]

Additional tests on existing specimens^{*} can be ordered electronically up to 5 days after collection, saving the time and inconvenience involved with collection of a second sample. (*If sufficient specimen remains in a suitable tube.)

Accessing Sonic Dx

Access online

Go to www.sonicdx.com.au

iPhone/iPad

Search for Sonic Dx and download the app

Android

Search for Sonic Dx and download the app

Current Webster users can login to Sonic Dx with their existing Webster username and password.
New users will need to apply for a username and password at sonicdx.com.au/register.

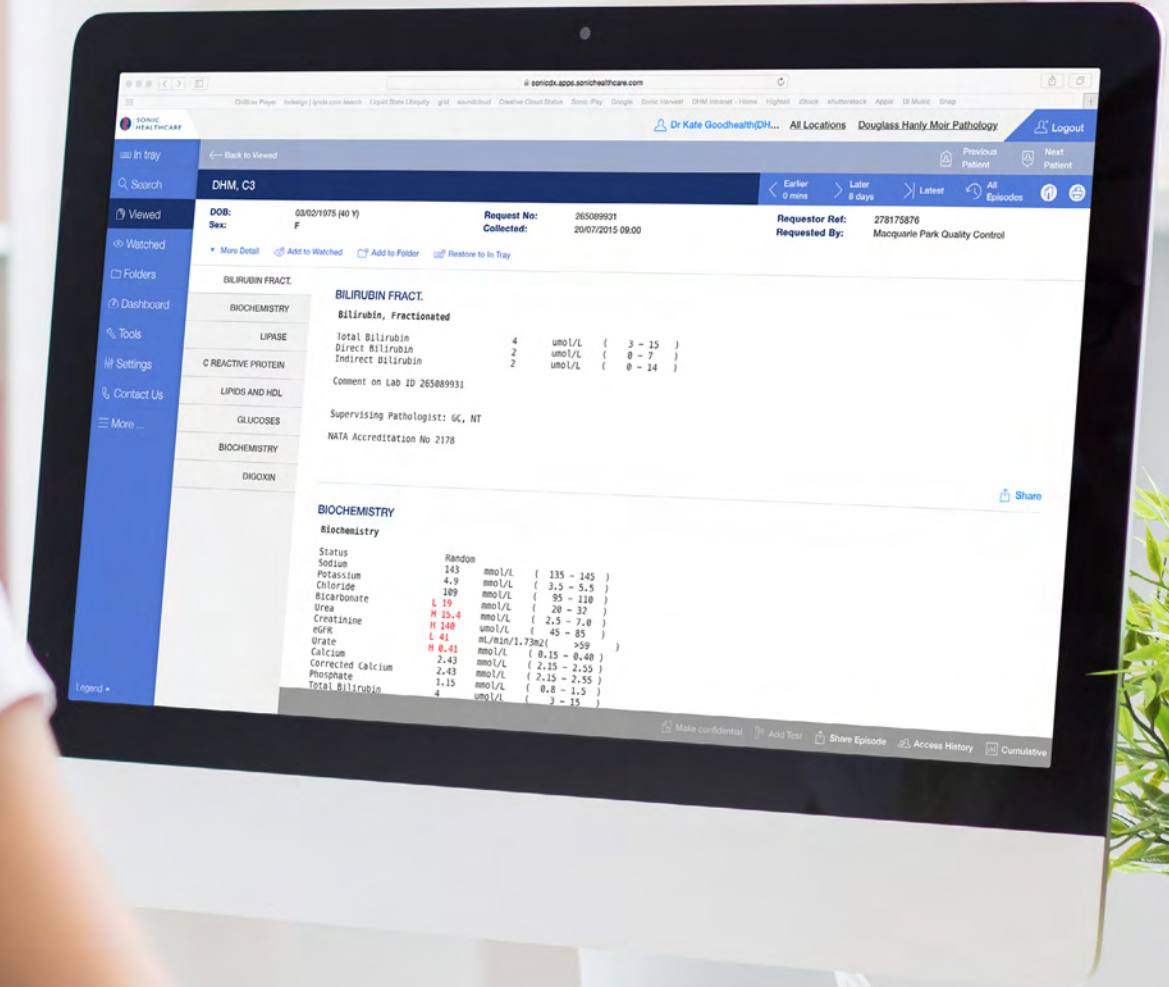

[^]Electronic requesting of tests may not be available at all labs

Sonic Dx

Simple and Intuitive

Pathology results—anywhere, anytime.

Now available in new desktop version

Now available

Access online
www.sonicdx.com.au

Sonic Dx is a revolution in pathology result reporting.

This feature-rich interface is fast and easy to use, and is now available on desktop, iPhone/iPad and Android.

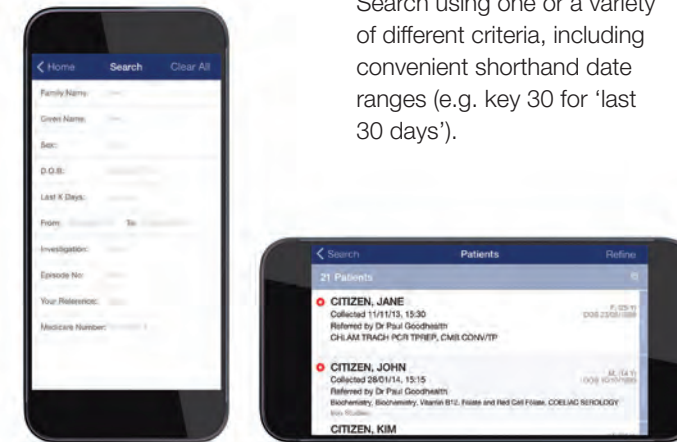

Cumulative results and graphing

View tabular and graphical cumulative results, and easily search earlier patient episodes.

Improved search

Search using one or a variety of different criteria, including convenient shorthand date ranges (e.g. key 30 for 'last 30 days').

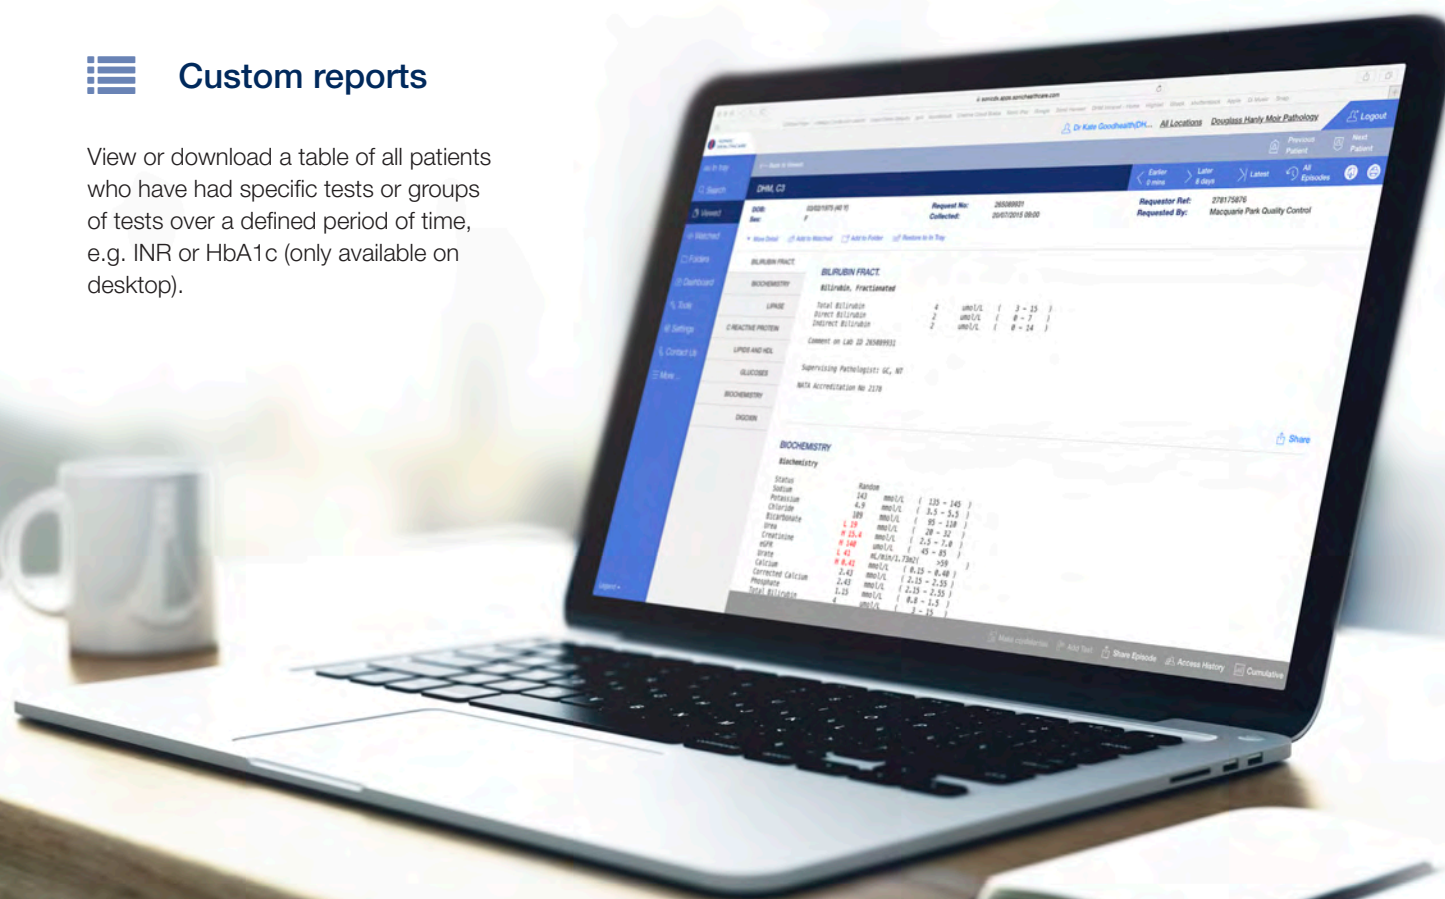

Quick, secure re-entry to the site

Automatic lock-out after 5 minutes of inaction to protect sensitive data. Simple re-entry via your chosen 4-digit PIN-code (mobile) or password (desktop).

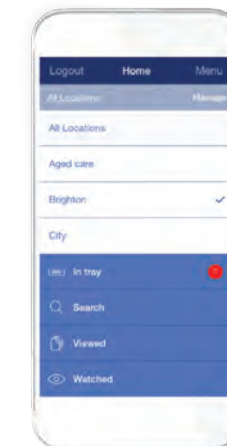

Custom reports

View or download a table of all patients who have had specific tests or groups of tests over a defined period of time, e.g. INR or HbA1c (only available on desktop).

Filter results by location and other options

Instantly filter the patients in your in-tray by changing your location when you arrive at a different clinic, hospital, nursing home, etc. You can also filter your results by time, urgency, etc.

Get detailed test information from SonicEdu

Seamlessly move from Sonic Dx to SonicEdu (Sonic Pathology Handbook) on your mobile devices. Simply press and hold a test name to link directly to SonicEdu for detailed information about specific tests and how to interpret results. (Only available on iPad/iPhone/Android. Coming soon to desktop.)
